Exposure to hazardous substances like caustic soda (NaOH), acids, and bases is a daily occurrence for workers in **the agri-food, water treatment, and chemical industry sectors**. They need equipment that is reliable, durable and designed to give them true peace of mind. This is exactly what **the newest version of the UTECH® boot** offers! Made with strong chemical-resistant materials, it efficiently protects against corrosive spills. Its robust structure includes sealed seams both inside and outside to prevent any infiltration, while its **VIBRAM® TC4+** outsole ensures a superior adherence on slippery surfaces. Ultra-light and equipped with excellent shock absorption, it combines comfort and safety, even in the most demanding environments. This model also has an external metatarsal protection, providing enhanced safety on the top of the foot against heavy impacts and falling objects.

UPPER

- 1 Neoprene and UTECH® leather upper providing high wear resistance to acids, bases, hydrocarbons, detergents and other chemicals
- 2 Inner and outer sealed seams
- 3 Ultra-resistant TPU PARESHOK™ sewn bumper toe
- 4 Ultra-durable nonwoven TAIBRELLE® lining

SOLE

- 5 VIBRAM® TC4+ rubber outsole for added traction and durability
- 6 Direct-attach PU midsole
- 7 Composite shank
- 8 Dual-density REVOLT™ insole made of low-density PU and ORTHOLITE® foam

PROTECTION FEATURES

- 9 REALFLEX™ external metatarsal protector
- 10 NANOTOE® carbon fiber protective toecap
- 11 Non-metallic puncture-resistant insole
- 12 Protection against electrical hazards
- 13 Chemicals resistance
